

Responses to Questions

1) For the wayfinding / mapping design / setup work estimates, can you please confirm the total number of buildings as well as the total number of interior floor maps?

The two kiosks will be in one building with four floors. One kiosk will be located on the first floor, with the second kiosk located on the third floor. Each floor consists of two distinct areas: the court wing and the administration wing. So, there may be either four large maps of the entire floors, or eight smaller maps of the different wings.
